LUIS MANUEL ZUÑIGA MORENO

System Engineer with an emphasis on software development

I am a PHP Backend developer with more than 7 years of experience in the field of development using Laravel and Symfony framework. I am very proactive in everything is assigned to me and I really like to learn every day. I feel comfortable working with Docker, Docker compose and using Jenkins for CI/CD; also, I use Git to control version in order to improve the project assigned to me and GitHub actions to build images for Docker Hub. I am highly discipline, and I am able to work in teams.
